

Water Habitats

I. fresh water

- A. rivers**
- B. lakes**
- C. stream/brooks**

II. salt water

- A. ocean**
- B. salt marshes**

III. Animals

A. mammals

- 1. skunk**
- 2. racoon**
- 3. beavers**
- 4. squirrels**

B. insects

- 1. mosquitos**
- 2. bees**
- 3. fly**
- 4. centipedes**

C. reptiles

- 1. snakes**

D. birds

- 1. osprey**
- 2. cormorants**
- 3. eagle**
- 4. seagulls**
- 5. crows**
- 6. pigeons**

E. crustaceans

- 1. crabs**

F. amphibians

- 1. salamanders**
- 2. frogs**

G. organisms

- 1. plankton**
- 2. fish**
- 3. snails**
- 4. worms**

IV. Shelter

A. rocks

B. moss

C. kelp

D. sticks

E. nests

F. sand

G. mud

H. mole hills

I. burrows

V. Environment

A. temperature

B. weather

C. human encroachment

1. healthy

a. fresh water source

b. full of nutrients

c. healthy ecosystem (yellowstone wolves changed the shapes of the rivers)

d. Book Connection

e. human influence

f. conservationists

2. unhealthy

a. development

b. filling wetlands

c. landfill

d. human influence

e. industry

f. recreational use

VI. plants

A. cord grass

B. fragmities

C. algae

D. spartinas

E. elodea

frog

swallow

bean plant

sun

cricket

lobster

snake
